

Guideline Key

Die	Glue	Bleed
Safe	Pref.	

INSTRUCTIONS: Place your artwork on the template above being sure to account for the bleed & making sure that all important information and/or logos fall within the live/safe area(s). Please be sure that you have centered your artwork within the safe area(s) properly or that it has been placed exactly where you would like it on the template. Please make sure that all flat images are at least 300dpi for printing purposes, otherwise those images may print blurry and/or pixelated.
